Experiences

Analyst and User Support 11/2023 - Currently, I work as an Analyst and User Support at Unioeste, within the institution's data center. My responsibilities include ensuring the smooth operation of systems, providing technical assistance to internal users, and implementing solutions for system optimization and security. I am always seeking updates in data center technologies to provide efficient and quality support.

Social Network Manager 04/2023 - 09/2023 - I was responsible for managing the digital accounts of the company EletroLimp, where it was necessary to develop regular posts.

UI Freelancer 09/2022 - 08/2023 - I worked as a freelancer for approximately 1 year and a half through the Workana platform, where my interest led me to create prototypes in Figma, during this period I gained a lot of experience with such technology.

Administrative Assistant 01/2023 - 06/2023 - I worked for approximately 6 months at the company OdontoMil as an Administrative Assistant. There, I was responsible for organizing administrative paperwork, contracts, and others. I was also responsible for scanning patient contracts and entering them into the relevant platform.

Community Projects 04/2023 - Currently, I am quite focused on community work on GitHub, helping with some projects. I have developed plugins and mods for games.

Professional Profile

Since the moment I sparked my interest in the programming field, I've been dedicating myself daily to achieve my first opportunity. It's been 2 years now during which I've been working on a variety of projects with the aim of applying and solidifying all my knowledge, and I'm confident that I'm ready to contribute to your team of developers. I have a knack for learning, effective communication skills, and I'm always striving to improve myself further.

Technologies

HTML5, CSS3, Javascript, UI UX, React, Vue, ML, MySql, NodeJs, Java and Git.
Academic Education
High School completed in 2019
Software Engineering started from 2022 to 2025.

Featured Projects

Extracurricular Courses

English - New York School - (Started in: Feb/2023)
Programming Logic - Harpa
Computer Science and Hardware - Harpa
Robotics and Basic Electrical Engineering - Eureka
Extracurricular Events

Extracurricular Events

Hackathon - Show Rural (Cascavel, PR) 2023 -

In this event, we participated with a college team aiming to learn from present consultants and enhance our knowledge. Our task was to find a solution for managing chicken waste on farms. The project was completed excellently, and we finished in 4th place.

Hackathon - Show Rural (Cascavel, PR) 2024 -

I represented our college team in a hackathon during the Show Rural in Cascavel, Paraná. Our challenge was to find solutions for managing chicken waste on farms. We completed the project excellently, securing 3rd place in the competition, which significantly contributed to our growth in skills and knowledge in the field.
